

ENGINEERING FOR KIDS

*Inspiring the **Next Generation** of Engineers*

Parents! Oratory has partnered with Engineering for Kids, an afterschool STEM Enrichment program that focuses on the Engineering Design Process while enhancing your students math and science skills! During the program students will have an overview of Aerospace, Electrical, Environmental, Marine, and Mechanical Engineering to name a few. They will explore harnessing energy, directional energy transformation, the relationship between potential energy and kinetic energy, and electrical circuitry.

Padres! Oratory se ha asociado con Ingeniería para Niños, un programa de enriquecimiento después de escuela que se centra en el proceso de diseño de ingeniería al mismo tiempo mejora las habilidades de matemáticas y Ciencias en nuestros estudiantes! los estudiantes participarán en la Ingeniería de Potencia y Energía, durante este programa los estudiantes explorarán ingeniería eléctrica, Ingeniería del medio ambiente. Ingeniería Marina e Ingeniería Mecánica.

Engineering For Kids goal is to inspire the next generation of ENGINEERS. Our programs are geared to help children ages 4-14 discover the fun and challenges behind STEM education. Building on natural curiosity and developing problem-solving skills, our hands-on programs are the ultimate in lifelong learning and educational discovery.

Back to School Special

\$75 per student

6 week Program
